```java
package com.tugas;

public class Main {

    public static void main(String[] args) {
        int alasAtas = 3;
        int alasBawah = 6;
        int tingi = 4;
        double luas;

         luas = 0.5 * (alasAtas + alasBawah) * tingi;
        System.out.println("MENGHITUNG LUAS TRAPESIUM");
        System.out.println("Luas     = 0.5 x (alas atas + alas bawah) x
tinggi");
        System.out.println("         = 0.5 x (" + alasAtas + "cm + " +
alasBawah + "cm) x " + tingi + "cm");
        System.out.println("         = "+ luas + "cm");
    }
}
```

```
Run:     Main ×

    "C:\Program Files\Java\jdk-11.0.10\bin\java.exe" "-javaagent:C:\Program
    MENGHITUNG LUAS TRAPESIUM
    Luas     = 0.5 x (alas atas + alas bawah) x tinggi
             = 0.5 x (3cm + 6cm) x 4cm
             = 18.0cm

    Process finished with exit code 0
```
